

Report
Of
SAP FICO – FINANCIAL ACCOUNTING AND CONTROLLING

Submitted
To
School of Computer Science and Engineering
IILM University, Greater Noida, U.P.

In partial fulfilment of the requirement of degree of
B.Tech CSE

By
Roll Number of Student: 25SCS1003003125
Name of Student: ASHISH KUMAR
Batch: 2026-27

2026-27

CANDIDATE'S DECLARATION

I, ASHISH KUMAR, do hereby declare that the internship report titled “SAP FICO – FINANCIAL ACCOUNTING AND CONTROLLING” has been completed by me to fulfil the requirement for the award of the degree of Bachelor of Technology in CSE. All the references used in this report have been properly acknowledged. I affirm that this report is my own academic work and has not been submitted to any other institute for any degree/diploma requirement and further I shall be solely responsible for any kind of copyright violation in this regard.

Roll No.: 25SCS1003003125

ACKNOWLEDGEMENT

I am using this opportunity to express my gratitude to everyone who supported me throughout the Internship Program. I am thankful for their guidance, constructive criticism and friendly advice during this work. I am sincerely grateful to everyone who shared their knowledge and views on the topics related to this internship.

I express my gratitude to my parents for their blessings and support.

Signature

Student Name: ASHISH KUMAR

CERTIFICATE OF EXPERIENCE

To Whomsoever It May Concern

This is to certify that **Ashish Kumar** successfully completed an internship with **YuvaIntern** in the role of **SAP FICO Internship**.

Throughout the tenure of this internship, Ashish demonstrated consistent dedication, professionalism, and a strong willingness to learn and grow. Their contributions were valued by the entire team at YuvaIntern, and they conducted themselves with integrity and commitment throughout the program.

We commend Ashish's hard work and wish them continued success in all future endeavors.

Certificate No: YI/2026/192098/425567

Date of Issue: October 05, 2026

4.1 Introduction

Enterprise Resource Planning (ERP) is used by organizations to integrate important business processes into a common system. SAP is one of the major ERP platforms used for managing business operations and information. SAP FICO is an important area of SAP that focuses mainly on Financial Accounting (FI) and Controlling (CO).

Financial Accounting helps an organization record and manage financial transactions and prepare information required for financial reporting. Controlling focuses on internal management activities such as cost monitoring, cost centre accounting, profit centre analysis and profitability-related reporting.

During my six-week internship at YuvaIntern, I studied the concepts, structure, configuration, reporting, troubleshooting and future development of SAP FICO. The internship was conducted remotely from August 24, 2026 to October 05, 2026.

The internship was divided into six major learning areas. The first week focused on SAP FICO fundamentals. The second week covered configuration concepts. The third week focused on a real-world SAP implementation case study. The fourth week covered SAP FICO reporting, while the fifth week focused on common issues and troubleshooting. The final week explored the future of SAP FICO and modern SAP Finance technologies.

This report presents the complete learning journey and summarizes the knowledge gained during the internship.

SAP FICO Overview

SAP FICO consists of two closely connected areas: Financial Accounting (FI) and Controlling (CO). Financial Accounting deals with external financial reporting and records financial transactions. Major areas include General Ledger, Accounts Payable, Accounts Receivable and Asset Accounting.

Controlling supports internal management by providing information related to costs, profitability and organizational performance. Important areas include Cost Centre Accounting, Profit Centre Accounting, Internal Orders and Profitability Analysis.

FI and CO work together to provide a connected view of financial and management information. SAP also integrates financial processes with other business areas such as Materials Management (MM), Sales and Distribution (SD), Production Planning (PP) and Human Capital Management (HCM).

In SAP S/4HANA, the Universal Journal provides an integrated basis for financial and management accounting information. This supports consistent reporting and analysis.

4.2 Organization Profile

YuvaIntern is the organization/platform through which I completed my six-week virtual internship in SAP FICO. According to the internship offer letter, the internship position was SAP FICO Internship at YuvaIntern. The internship was conducted remotely from August 24, 2026 to October 05, 2026.

The internship was focused on learning concepts related to SAP FICO and enterprise resource planning. The internship activities included studying Financial Accounting, Controlling, SAP FICO configuration concepts, reporting, troubleshooting, SAP integration and future developments in SAP Finance.

The internship provided a structured learning opportunity to understand how SAP FICO supports financial management and business processes. During the internship, I studied different topics week by week and prepared documentation based on the assigned learning areas.

The internship also helped me connect academic concepts with business applications. Through research, examples, diagrams and case-study analysis, I developed a better understanding of how SAP FICO can support financial information management, cost control, reporting and decision-making.

Overall, YuvaIntern provided the internship framework through which I explored SAP FICO concepts over a period of six weeks.

4.3 Problem Statement

Organizations generate a large amount of financial and operational information through activities such as purchasing, sales, production, payroll and financial transactions. Managing this information separately can make financial reporting, cost monitoring and decision-making more difficult.

The main problem studied during this internship was understanding how an integrated ERP system such as SAP can bring financial and management information together. The internship focused on understanding how SAP FICO supports financial accounting, controlling, reporting and integration with other business functions.

Another important area was understanding the problems that can occur in SAP FICO, such as configuration issues, master data problems, posting issues, integration problems and authorization-related issues. Studying troubleshooting methods helped in understanding how SAP problems can be approached systematically.

The internship also addressed the need to understand how SAP Finance is changing with technologies such as SAP S/4HANA, cloud computing, automation, artificial intelligence and real-time analytics.

Therefore, the overall problem addressed through this learning project was to develop a structured understanding of SAP FICO, its business applications, configuration concepts, reporting, troubleshooting and future developments.

4.4 Project Objectives

The main objective of this internship was to develop a basic and structured understanding of SAP FICO and its role in enterprise financial management.

1. To understand the basic concepts of SAP and ERP.
2. To study Financial Accounting (FI) and its major components.
3. To study Controlling (CO) and its major components.
4. To understand the integration between FI and CO.
5. To understand SAP FICO configuration concepts.
6. To study the integration of SAP FICO with other SAP modules.
7. To understand different SAP FICO reports and their uses.
8. To study common SAP FICO issues and troubleshooting approaches.
9. To analyze a real-world SAP implementation case study.
10. To understand SAP S/4HANA and the Universal Journal.
11. To study emerging technologies such as cloud, automation, AI and analytics in SAP Finance.
12. To identify skills that may be useful for future SAP FICO professionals.

4.5 Scope of the Project

The scope of this internship covers the study and documentation of important concepts related to SAP FICO. The project focuses on understanding how SAP supports financial accounting, controlling, reporting and business integration.

The scope includes Financial Accounting areas such as General Ledger, Accounts Payable, Accounts Receivable and Asset Accounting. It also includes Controlling areas such as Cost Centres, Profit Centres, Internal Orders and profitability-related concepts.

The project also covers basic SAP FICO configuration concepts, including enterprise structure, company code, controlling area, chart of accounts, fiscal year and posting periods.

Another part of the scope is the study of integration between SAP FICO and other modules such as MM, SD, PP and HCM. Reporting and troubleshooting are also included to understand how financial information is analyzed and how common system issues can be approached.

Finally, the project covers SAP S/4HANA, Universal Journal, cloud-based finance, automation, artificial intelligence and real-time analytics as important areas of future SAP Finance.

4.6 Technologies and Tools Used

During the internship, I studied SAP FICO and related ERP concepts through research, documentation and structured learning activities. The main technology area covered was SAP FICO, including Financial Accounting and Controlling.

SAP S/4HANA concepts were also studied, particularly the Universal Journal and integrated financial reporting. SAP Fiori and embedded analytics were explored as modern approaches to accessing financial information and reports.

Microsoft Word and documentation tools were used for preparing internship reports and organizing research findings. Web-based research was used to study SAP documentation, customer stories and other reliable information.

GitHub can also be used as a repository for maintaining internship documentation and supporting project files, where required by the internship or university.

The internship was primarily focused on learning and research. Therefore, the tools and technologies mentioned in this section represent the areas studied during the internship and should not be interpreted as claiming access to a live production SAP environment.

4.7 System Architecture

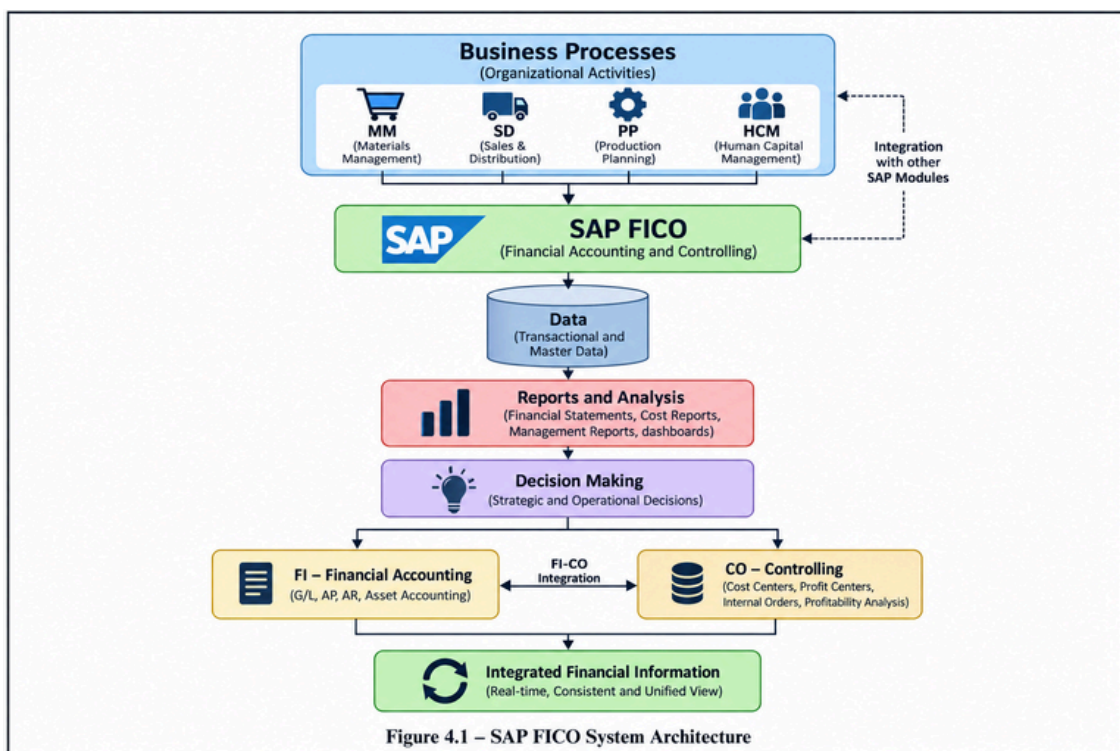

SAP FICO operates as an integrated part of an ERP environment. Financial and controlling information can be connected with different business processes so that financial information can be recorded and analyzed.

Financial Accounting handles financial transactions and external reporting, while Controlling provides information for internal management and cost analysis. Other SAP modules can interact with FICO through integrated business processes.

Materials Management can generate financial information during procurement activities. Sales and Distribution can affect receivables and revenue through sales and billing processes. Production activities can generate cost information, while payroll processes can affect financial accounting.

In SAP S/4HANA, the Universal Journal provides an integrated basis for FI and CO information.

Figure 4.1 – SAP FICO System Architecture

4.8 Methodology

The internship was completed through a six-week structured learning approach. Each week focused on a specific SAP FICO topic and gradually increased my understanding of the subject.

Week 1 – Understanding SAP FICO

I studied the basic concepts of SAP, ERP and SAP FICO. The week covered Financial Accounting, Controlling, FI-CO integration and integration with other SAP modules. I also studied SAP S/4HANA and the concept of the Universal Journal.

Week 2 – SAP FICO Configuration

I studied the basic principles of SAP configuration and how organizational structures and financial settings are represented in SAP. Topics included company code, controlling area, chart of accounts, fiscal year, posting periods, G/L, AP, AR, Asset Accounting, Cost Centres, Profit Centres and Internal Orders.

Week 3 – Real-World SAP FICO Case Study

I studied a real-world SAP implementation case study to understand how SAP can be applied in an organizational environment. The case study helped connect theoretical SAP FICO concepts with business challenges, implementation activities and expected business benefits.

Week 4 – SAP FICO Reporting

I studied different types of SAP FICO reports used for financial and management purposes. These included General Ledger, Accounts Payable, Accounts Receivable, Asset Accounting, financial statements, Cost Centre, Profit Centre, Internal Order and profitability-related reports.

Week 5 – SAP FICO Troubleshooting

I studied common SAP FICO issues and a systematic troubleshooting approach. The methodology involved identifying the problem, tracing the transaction, checking relevant master data and configuration, and reviewing authorization-related factors.

Week 6 – Future of SAP FICO

In the final week, I studied the future development of SAP Finance. The main areas included SAP S/4HANA Cloud, artificial intelligence, automation, real-time analytics, SAP Fiori and integration with other systems.

This six-week methodology helped me progress from basic SAP FICO concepts to configuration, reporting, troubleshooting, real-world implementation and future SAP Finance trends.

4.9 Expected Outcomes

The internship was expected to provide a structured understanding of SAP FICO and its role in enterprise resource planning. Through the six-week learning process, I developed knowledge of Financial Accounting, Controlling, configuration concepts, reporting, troubleshooting and SAP integration.

I also developed an understanding of how SAP FICO connects financial activities with other business functions and how integrated information can support reporting and decision-making.

The case study helped me understand the importance of SAP implementation in a real organizational environment. The reporting and troubleshooting topics provided an understanding of how financial information is analyzed and how common SAP problems can be approached.

The final week helped me understand how SAP Finance is developing through S/4HANA, cloud computing, automation, artificial intelligence and real-time analytics.

Overall, the internship provided me with a foundation for further study of SAP FICO and helped me identify areas in which I can continue developing my technical and analytical skills.

Personal Learning and Reflection

My understanding of SAP FICO developed gradually during the six-week internship. In the beginning, I focused on understanding ERP and the basic purpose of SAP FICO. Later, I studied configuration concepts and the relationship between Financial Accounting and Controlling.

The case study helped me understand how SAP can be used in a real business environment. Studying SAP reports helped me understand the importance of financial information for monitoring business activities and supporting decisions.

The troubleshooting week showed me that identifying the actual cause of an SAP issue is important before attempting a solution. Finally, studying the future of SAP FICO helped me understand the growing importance of cloud technology, automation, AI and analytics.

Overall, the internship strengthened my interest in ERP and SAP-related technologies. It also showed me that continuous learning is important because enterprise technologies continue to change.

4.10 Certificates of Completion and Other Communication Mail Proof

This section contains the supporting documents related to my internship. These documents provide evidence of the internship period and completion of the internship program.

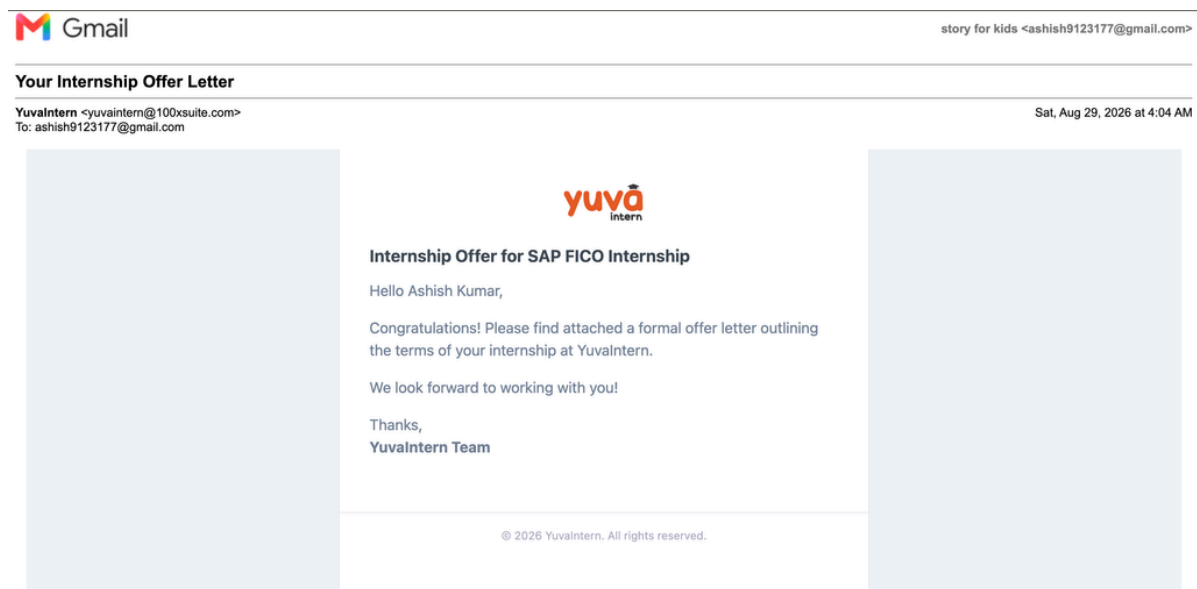

The internship offer letter confirms my SAP FICO internship with YuvaIntern, including the internship period from August 24, 2026 to October 05, 2026 and the duration of six weeks.

Any relevant internship communication or email correspondence may also be attached in this section, where available.

INTERNSHIP OFFER LETTER

Date of Issue: August 24, 2026

Dear Ashish Kumar,

We are pleased to extend to you this formal offer for an Internship position as **SAP FICO Internship** at **YuvaIntern**. We were impressed with your background, skills and enthusiasm, and we believe you will be a valuable addition to our team.

Internship Details

Start Date : August 24, 2026
End Date : October 05, 2026
Duration : 6weeks
Location : Remote

Key Responsibilities:

As a **SAP FICO Internship** intern, you will work on tasks and projects related to Take the first step towards your dream career in ERP sector with our SAP FICO Internship Program. This virtual internship is designed to give you hands-on experience in handling SAP FICO modules, financial accounting, controlling, and much more. You will get a chance to work on real-time projects and understand the nitty-gritty of ERP systems. This role does not only provide you technical knowledge but also enhances your problem-solving and analytical skills. This is a fantastic opportunity to apply your academic knowledge into practice in a supportive and professional environment. Join us and shape your future in the ERP sector..

Benefits & Learning Opportunities:

Throughout the duration of your internship, you will have the opportunity to:

- Develop practical skills in [relevant skills/tools].
- Gain hands on experience in [specific tasks/projects].

As part of joining our team, you may be required to sign a confidentiality or non-disclosure agreement. You are also expected to comply with all applicable company policies and regulations, which will be provided to you upon commencement.

We look forward to welcoming you to the team.

Kounal Gupta

CERTIFICATE OF EXPERIENCE

To Whomsoever It May Concern

This is to certify that **Ashish Kumar** successfully completed an internship with **YuvaIntern** in the role of **SAP FICO Internship**.

Throughout the tenure of this internship, Ashish demonstrated consistent dedication, professionalism, and a strong willingness to learn and grow. Their contributions were valued by the entire team at YuvaIntern, and they conducted themselves with integrity and commitment throughout the program.

We commend Ashish's hard work and wish them continued success in all future endeavors.
